Hello (b) (6), it was good to speak with you today. As indicated on the phone, at this time we are not aware of any immediate health related concerns when on the property on in the homes located on or near the site. The property in questions does have a fenced area in the backyard that limits access to tar-like material that is mostly buried but can be found on the surface in various spots. Please stay outside of the fenced area, and if you do find additional areas on the property outside of the fenced area where the tar-like material has come to the surface, please notify me and do not touch it.

Please find attached, some site literature to help you understand the site better as well as the cleanup process we are using to investigate and potentially cleanup the site. This information can be shared with any other person interested in the site. The ATSDR ToxFAQs are information related to the contaminants we know to exist on the site. If you have other questions, do not hesitate to call. Also, if you wish to talk with the ODEQ project manager Todd Downham, I have included him on this email, and his number is 405-702-5136.
